

20/15 Visioneers

Better Vision = Better Outcomes

R&D Management
& Marketing
Consultants

Culture, Data, Technology, & Process

The Holistic Four Pillars of Science and Technology Success

Visioneering (i.e., the engineering of a clear vision and deliverable) is the cooperative triad of governance, management, and monitoring, which is an essential framework in the science of sustainability.

We bring you the art of the possible in science and technology, and help you manage change and deliver on the promise of improvement. 20/15 Visioneers specializes in scientific informatics so that our R&D partners can realize the power of their FAIR data and processes and drive secondary use of their Model Quality Data and in Silico-First approaches to their science. With some very fundamental offerings:

- Scientific Data and Process Strategies, Differential Privacy
- Global Scientific Solution/Data Assessments, Vendor Market Analysis, Selection, and Deployments
- Cloud Lab Expertise and Enablement
- Portfolio to Program to Project Change Management and Governance

Team Members

John F. Conway
Chief Visioneer Officer

Ralph Rivero, PhD
Senior Chemistry Visioneer

Yolanda Sanchez, PhD
Senior Translational Visioneer

Juan Manuel Dominguez, PhD
Senior Biochemistry Visioneer

Erin Moran
Global Head of Business Operations

Aleksandra Wlodarczyk, PhD
Head of Business Development EMEA

Junior Lee
Senior Business Development Visioneer

Scott Rosenberg
Senior IT Visioneer

Working with Start-Up to Large R&D Organizations

Deep Expertise When You Need It

Our industry hardened consultants come from some of the best R&D companies in the world. True Been-There-Done-That experts that are passionate about science and improving your experiences.

Some of the areas we are making impacts and positive impressions are:

- New Modalities- Informatics and Workflow Optimization
- Multi-Omics & Microbiome
- Scientific Mapping (Value Stream, Capability, and Business Process)
- Technology and Visioneering on Next Generation Technology Replacements
- Process Harmonization and Optimization
- Ultra-Efficient Assessments (Vector)
- Project Management, Business Analysis, and Business Relationship Management

Visioneering Thought & Practice Leaders

Culture-First Approach

We learned early on in our careers that culture trumps everything else, and if we lead with it great things will follow. We bring this quality to our work and it is quickly noticed by our clients and partners.

Data & Process Evangelists

Driving FAIR principles and data and process as an asset. Producing Model Quality Data to drive in Silico-First initiatives.

Cloud Evangelists

Properly managed, Cloud deployments and capabilities drive much large efficiencies, collaboration and harmonized and optimized processes.

Cloud Lab & Automation Evangelists

We are heavily partnered with the automation industry and will help you drive reproducible outcomes wherever possible and feasible.

High Throughput Experimentation as a Service (HTEaaS)

Working with you to get your HTE experiments completed faster and with a much lower cost basis.

IT/IX Project Examples:

- Global ELN Replacement (Top 5 Biopharma)
- Biobanking Business Analysis & Mapping
- Quantitative Clinical Pharmacology Assessment, Selection, & Implementation
- Next Generation Multi-Omics Environments
- DNA Encoded Libraries (DELs) Program
- Oligos Program
- New Modality Frameworks
- Global ELN, LIMS, LES, MES Selection & Replacement
- MDM & Metadata Harmonization Project
- In Silico-First Transformation Project
- Microbiome Inclusion
- HTE-as-a-Service Cloud Labs
- 3 & 5 Year Roadmaps
